

## REMOVE WASTE AND RUBBISH MATERIALS FROM THE PREMISES

### CODE SECTIONS

#### *2010 Yocha Dehe Fire Code*

**Section 304.1 Waste accumulation prohibited.** Combustible waste material creating a fire hazard shall not be allowed to accumulate in buildings or structures or upon premises.

**Title 19, 3.07(a) General.** No combustible materials shall be placed or stored within 10-feet of any building or structure.

### EXPLANATION

All combustible rubbish or waste products (garbage) shall be removed from the premises prior to becoming a significant fire hazard. The products must be stored in approved containers, such as rubbish containers and located in a fire department approved location (see Guide #49).

### RATIONALE

The accumulation of combustible waste products greatly increases the fire potential for the business. These materials are easily ignited and have proven to significantly add to the fire growth in a building.

Date: January 1, 2011
